

# WINHILLS

## Year 3 and Year 4

### Fortnightly Newsletter

#### Year 3

##### English

Year 3 have been busy creating sequels to our class story 'The Wild Robot'. They have created their own story maps and have independently thought of characters and places that the robot could visit.

##### Mathematics

During our first few weeks back we have been recapping the four operations and delving deeper into reasoning and problem solving.

##### Science

We have started our new light topic and the children thoroughly enjoyed investigating how light travels using torches.

#### Year 4

##### NFER tests

During our first week back after half term, the children completed some short tests and they all did amazingly! Their confidence has improved so much, I am very proud.

##### Grafham

Year 4 had a wonderful time at Grafham this week. Although the sun wasn't out all the time, the windy and rainy weather didn't stop our fun. We were super proud of them, they worked really well together. The photos will be uploaded very soon.

### ICE Zone

Year 3 and 4 have been whizzing through all their ICE zone work. They have mostly all finished their amazing canopic jars and are now creating their own scarab beetles out of clay. They are using a range of tools and equipment to manipulate the material.

### Reminders

Please make sure that the children have warm clothes with them everyday as they are going outside to learn!

Also, as of last week, we are handing out the literacy homework. This is due in on a Monday.

Lastly, please make sure the children are completing 1 hour of maths whizz a week and reading every night! We will be checking reading journals every week.
