

WINHILLS

Year 3 and Year 4

Fortnightly Newsletter

Year 3

English

Year 3 have started a new story in class called Bedtime for Monsters. They have been practising their inference skills and have been building character profiles full of amazing adjectives ready to write a character description of the monster.

Maths

The children have moved on to multiplication and division and are building on their times table knowledge to support them with their learning. Earlier this week, we were focusing on repeated addition to multiply and learnt that multiplication is commutative.

Science

In science, Year 3 have started their new topic on animals including humans. They are beginning to look at what is considered a balanced diet and how we can look after our bodies.

Year 4

English

Year 4 have now started their new English unit based on stories in imaginary worlds. They have been focusing on the descriptive language used in these types of stories and the effect these have on the reader.

Maths

The children have been working hard learning all about multiplication and division facts. Earlier this week, the children learnt all about factors and multiples.

Science

In Science, Year 4 have been learning all about human impact on our environment. They have created their very own leaflets detailing how the human race is damaging our world.

ICE Zone

The children are still working really hard in our ICE zone. They are fully immersed in everything Tudor and they have recently written their own persuasive letters in role as either Henry VIII or one of his ill-fated wives! These letters are addressed to the Tudor executioner, can you guess what they are about?

Reminders

Please make sure that the children have warm clothes with them everyday as they are going outside to learn!

Also, as of last week, we are handing out the English homework. This is due in on a Monday.

Lastly, please make sure the children are completing 1 hour of Maths Whizz and week and reading every night! We will be checking reading journals every week.
